MICRO-SURFACING, NORTH, 2012 NEW CASTLE COUNTY

Wednesday, May 22, 2013

| Q # | Question | Answer |
|------------|--|--|
| 2 | Pertaining to item # 403510 Poly-Modified Emulsion Micro-Surfacing, for the above referenced project, are truck mounted units allowed to be used for application? The spec is unclear. | <p>As long as the equipment that will be used meets the specifications outlined in the special provisions under 403510 in the contract documents, specifically in the section marked "Equipment", and further, can meet the remaining specifications, the Engineer may approve upon reviewing the units's specifications.</p> <p>On a side note, whether or not you can include this part, on the past contracts, the truck mounted units were the only ones that worked on some of the back roads in North District (and we preferred them). I cannot give a blanket statement that says this specific truck mounted unit they reference will be approved because I have not seen the specifications of this particular piece of equipment.</p> |
| 1 | For this bid, I don't see a liquidated damages amount in the contract. Does ones apply here and what is the cost? | Liquidated damages are covered under the Standard Specifications, Division 100, Section 108, specifically 108.08 and 108.09. Also, we do not put in the exact amount of liquidated damages because it is determined by the actual successful bid price. |
